

## Potato

Period	Name	Country	Problem addressed
2008-2010	Ndacyayisenga Theophile	Rwanda	Resistance to potato late blight
2010-2012	Iragaba Paula	Uganda	Earliness and resistance to late blight
	Kesiime Vasiter Eunice	Uganda	Tolerance to drought stress
2016-2018	Muhumuza Edgar	Uganda	Tuber characteristics of selected F1s

## Sweet Potato

Period	Name	Country	Problem addressed
2008-2010	Shumbusha Damien	Rwanda	Developing varieties with high dry matter content
2014-2016	Musabyemungu Anastasie	Rwanda	Adaptability and inheritance of Anthocyanin content
	Oriba Alice	Uganda	Root shape and resistance to weevil
2016-2018	Florence Osaru	Uganda	Characterization and stability of weevil-resistance factors
	Odama Roy	Uganda	Resistance to weevils
	Natuhwera Malson Gabiri	Uganda	Characterization for key processing traits

## Cassava

Period	Name	Country	Problem addressed
2012-2014	Molly Allen	Uganda	High beta carotene and tolerance to brown streak virus
	Gabriel Joshua Gadet Riek	South Sudan	Adaptation to high altitude areas in Uganda
2014-2016	Wilfred Abincha Magangi	Kenya	Near-infrared spectroscopy for pro-vitamin A carotenoids content
	Valentor Okul [Adhiambo]	Kenya	Brown streak virus titre in leaf, stem and roots
	Ntivuguruzwa Severin	Rwanda	Stability of cassava genotypes in highland areas
	Mikidadi Abubakar	Tanzania	Effect of plant growth regulators on flowering & seed set
	Emmanuel Frank Mrema	Tanzania	Between- and within-cluster crosses for resistance to cassava brown streak virus
	Amuge Esther Sarah	Uganda	Grafting techniques to enhance flowering and seed set
	Nanyonjo Ann Ritah	Uganda	Effect of palatability traits on adoption
	[Musa] Yasmin Ibrahim Hussin	South Sudan	Barriers to flowering and seed set, and seed viability traits
	Acquilino Lado Legge Wani	South Sudan	Flowering, seed set & crossing response to diverse agroecological areas
